

Lawrence E. Larson received the BS degree in Electrical Engineering in 1979, and the M. Eng. degree in 1980, both from Cornell University, Ithaca, NY., He received the Phd degree in Electrical Engineering from the University of California - Los Angeles in 1986. He joined the Hughes Research Laboratories in Malibu California in 1980, where he directed work on high-frequency InP, GaAs and silicon integrated circuit development for a variety of radar and communications applications. While at Hughes, he led the team that developed the first MEMS-based circuits for RF and microwave applications. He was also Assistant Program Manager of the Hughes/DAR PA MIMIC Program from 1992-1994. From 1994-1996, he was at Hughes Network Systems in Germantown, Md., where he directed the development of radio frequency integrated circuits for wireless communications applications. He joined the faculty at the University of California -San Diego, in 1996, where he is the inaugural holder of the Communications Industry Chair. He was co-recipient of the 1996 Lawrence A. Hyland Patent Award of Hughes Electronics, for his work on low-noise millimeterwave HEMTs. He has published over 100 papers and has received 23 US patents.
