**Joshua Alspector**

Josh Alspector received his Ph.D. from MIT in 1971. He worked at Bell Labs and Bellcore for 17 years in CMOS electronics and adaptive systems research. He is best known for the invention of a neural networking learning microchip. Since 1996 he has been a professor of electrical and computer engineering at the University of Colorado at Colorado Springs and also the El Pomar endowed chair in information technology. He is a fellow of the IEEE. His current research is in the use of intelligent systems in information technology.
