Searching for 500 MHz
Considering Radar Bands

Presentation by Karl B. Nebbia, Associate Administrator, Office of Spectrum Management
National Telecommunications and Information Administration
Radar Bands Under Consideration

- 1300-1390 MHz
- 2700-2900 MHz
- 2900-3100 MHz
- 3100-3650 MHz
Locations available – Are they Useful?

Portrayal limited by bandwidth considered

Uses 100% of time except for antenna rotation and signal duty cycle. Is it realistic to use these characteristics?

Are there other uses operating in the gaps?

Contours depend on assumptions of sharing activity.
