

ISART 4-6 March 2002

A European View on Frequency Mangement and Standardisation

Søren Hess – European Radiocommunications Office

Søren Hess is working for the European Radiocommunications Office with special activities within the current and future frequency management solutions. He has developed a number of projects and initiated harmonisation initiatives in Europe in support of the work carried out within the CEPT organisation. He is currently leading the Short Range Device group within the CEPT responsible for new developments in this area including the regulation for UWB technology in Europe.

Prior to the ERO work he was working for the National Danish Telecom Operator in the field of business development. For a number of years hes was also working for the National Danish Telecom Agency in the field of frequency management and has participated in a large number of international meetings and conferences including ITU WARC's.
