

Carl R. Nassar received his Bachelors, Masters, and Doctoral degrees from McGill University, Montreal, Canada, in 1989, 1990, and 1997 respectively. Between his Masters and Ph.D., Dr. Nassar worked for a time as a design engineer at CAE Electronics, and upon completion of his Ph.D. accepted a position as assistant professor at McGill University. In late 1997, Dr. Nassar moved out west to join the faculty at the department of ECE at Colorado State University (CSU).

At CSU, Dr. Nassar directs the RAWCom (Research in Advanced Wireless Communications) lab, which focuses on advancements in DS-CDMA, TDMA, MC-CDMA, OFDM, and multi-carrier technologies. Dr. Nassar is the author of numerous journal and conference papers as well as the two books Telecommunications Demystified (a friendly introduction) and Multi-Carrier Technologies for Future Generation Wireless.
