

Dr. Larry Alder, Vice President Technology Development, has been with ArrayComm since early 1995. Prior to joining ArrayComm, Dr. Alder received his Ph.D from Stanford University in the specialty of Control Theory. He then spent three years as a Senior Control Systems Engineer at Adept Technology where he developed control systems for commercial robots. Since joining ArrayComm as a systems engineer, Dr. Alder has worked on the ArrayComm's core technology and has played a significant role in the development of many of ArrayComm's commercial products. Dr. Alder has been in an Engineering management role at ArrayComm for the last 4 years. During the last year and half, he has lead the *i-BURST* portable broadband wireless development organization.
